

EchoSign Introduces Global Edition!

EchoSign Global Edition allows both US-based global organizations, and European-based organizations to leverage localized electronic signatures for their customers and partners. With Global Edition, EchoSign users can capture, manage, and present user information in multiple languages and signers can electronically sign documents in their native language.

Localized, Personalized Signer Experience

EchoSign Global Edition allows signers to execute contracts in their native language. EchoSign Global supports a variety of European languages including English, German, French, Spanish, Italian, Dutch and more.

For faxed signatures, users will receive a fax cover sheet in their native language and will be able to send the signed copy to a fax number in their region through EchoSign's Global Fax Network.

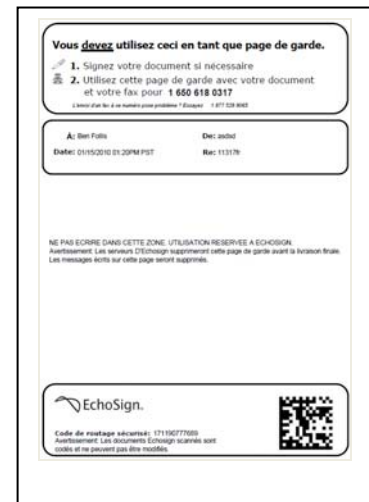

Localized Form and Signature Information

When signing or completing on-line forms, EchoSign Global captures, stores and presents user data in any European or East Asian (Japanese, Chinese, Korean) language.

Flexible Configuration Options

Administrators can set the default signing language for internal and external signers. In addition, senders may personalize their language preferences for all agreements, or individual agreements.

Pricing

EchoSign Global Edition is available for \$39.94/user/month (annual payment) and \$49.95/user/month (monthly payments).
