

FOR IMMEDIATE RELEASE

**ECHOSIGN CEO JASON LEMKIN SELECTED TO PRESENT AT  
VENTUREWIRE CONFERENCE**

**-- Lemkin to Speak on Using Consumer Internet Technologies to Radically Simplify  
Enterprise Document Management**

San Jose, Calif. May 25, 2006 – EchoSign, ([www.echosign.com](http://www.echosign.com)) today announced that the company's CEO and co-founder Jason Lemkin was selected to present at the VentureWire Enterprise Ventures Conference. Lemkin will speak about EchoSign and how it leverages state-of-the-art consumer internet technologies to offer the first entirely automated document management system. This year's event will be held at the Fairmont Hotel in San Jose, from May 31-June 1.

Lemkin will present an overview of EchoSign's customers, business model and Ajax-based technology. EchoSign offers a Web 2.0 document management solution that completely automates -- and exposes the business processes around -- signing, tracking, managing and archiving paperwork. With the EchoSign.com service, the previously opaque and analogue world of document execution and tracking is automatically turned into fully visible web-based business processes. EchoSign enables organizations to see the real-time status of all of their agreements, if and when deals are really getting signed, and how and by whom documents have been signed, approved and shared.

The 10th annual Enterprise Ventures conference ([www.venturewire.com](http://www.venturewire.com)) will review the most innovative enterprise technologies and probe the strategies of IT buyers across Corporate America. It will focus on the opportunities for startups and venture capital investors in supplying the enterprise network.

**About EchoSign**

EchoSign's mission is to improve the document management and tracking experience for users by leveraging the convenience and benefits of Web 2.0 technology. Based in Palo Alto, Calif, EchoSign provides a secure AJAX web client that makes the process of getting documents signed, tracked, managed, and archived painless. More information on the service is available at [www.echosign.com](http://www.echosign.com), or by calling 650-352-5454.
