[I don't have a digital copy, and would like to fax in my document.](#)

Signature Options (What's the difference?)

e-Signature Fax Signature

I need to add my signature to this document.

I want to password protect this document.

I would like to place signature blocks and form fields before sending.

[Send](#)

You Send
It only takes seconds to separate multiple e-mail

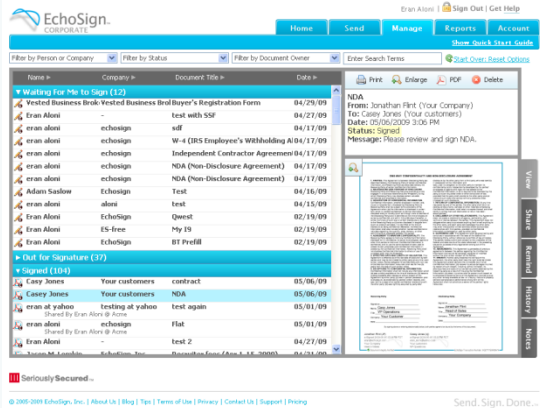

They Sign
They can e-Sign instant back into EchoSign.

You're Done
After everybody signs it immediately e-mailed to copy for you in your EchoSign.

***Getting A Signa Has Never Been**

Manage.

1. Set reminders
2. Track the status of your documents
3. View your documents' audit trail
4. Search and sort by any field

The screenshot shows the EchoSign Corporate interface. At the top, there are navigation tabs: Home, Send, Manage, Reports, and Account. Below this is a search bar and a filter menu. The main area displays a table of documents with columns for Name, Company, Document Title, and Date. The table is filtered to show documents 'Waiting for Me to Sign (12)'. A detailed view of a document is shown on the right, including the document content and a 'Sign' button.

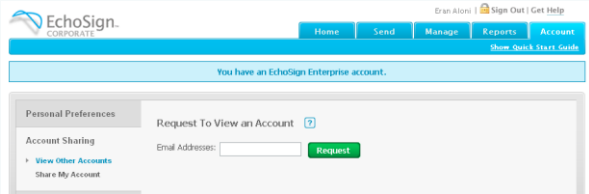

Report.

1. Track your team's performance
2. Create custom reports
3. Compare your performance with other companies in your industry,

Share.

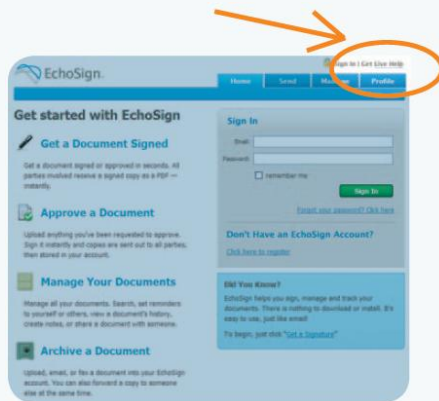

1. View your team members' accounts
2. Share your documents with others

The screenshot shows the 'Request To View an Account' form in the EchoSign Corporate interface. It includes a 'Personal Preferences' section, an 'Account Sharing' section with a 'Request' button, and a 'Share My Account' section.
